

Solar Funding Solutions

Power Purchase Agreement (PPA)

Shawton Energy gives businesses and building owners the opportunity to maximise their roof space for power generation, reducing energy costs while enhancing value and helping them to meet Net Zero targets. All without any upfront capital outlay.

We will deliver a turn-key bespoke solar solution bespoke to your needs by designing, building, installing, maintain, operating solution with no upfront capex or ongoing opex

- ✓ We own the assets and install on your property
- ✓ In return you buy clean renewable energy from Shawton Energy at a reduced price that is future proof.
- ✓ We maintain and operate the solar solution for the length of the contract
- ✓ When the agreement comes to an end you 100% own the Solar PV System and the energy that is generated.

Why Act Now?

- ✓ Combat high energy prices with cheaper, greener energy
- ✓ Deliver on your Net Zero objectives
- ✓ Differentiate yourself from your competitors
- ✓ Improved bottom line and increased profitability
- ✓ Increased brand engagement and loyalty
- ✓ Maintain cash reserves by accessing a funded solution

We use SolarEdge inverters which gives you full visibility of your system's technical and financial performance, including interactive charts and site layouts with easy access from a computer, smartphone or tablet

1

Receive energy data

We receive your previous 12 months half hourly electrical usage data plus your last 3 months electricity bills.

2

Design

We initially do a desktop design and then do a more technical in-depth design as we progress.

3

PPA

We enter into a Power Purchase Agreement for the agreed term – usually between 15 and 25 years.

4

Install

Our highly skilled in-house technical & engineering team will then proceed to install the PV system.

5

Cheaper, green energy

As soon as the system starts generating energy you can start to enjoy cheaper, greener energy at a much reduced price from the grid knowing that your carbon footprint is reducing.

6

Maintain

Shawton Energy will operate and maintain your solar solution throughout the contract to ensure you continue to receive cheaper, greener energy.
