CASE STUDY

BEP Surface Technologies

We installed a 123.82kWp rooftop Solar PV system at BEP Surface Technologies, delivering a fast, efficient installation completed within just two weeks. The system will enhance the site's energy efficiency, providing an annual carbon reduction of 34,397kg while helping to lower ongoing electricity costs.

THE PROCESS

The installation was completed quickly and seamlessly, ensuring minimal disruption to daily operations while enabling the site to begin generating its own electricity immediately.

THE RESULT

BEP Surface Technologies can now benefit from lower electricity costs and generate 114,703kWh of clean energy every year, demonstrating a clear commitment to sustainability and Net Zero targets.
