

CASE STUDY

Double Tree Hilton

Installed in
2 Weeks

Annual reduction of
15 Tonnes
of CO₂ emissions

65,800 kWh
Annual Energy Generation

74.21 kWp
Array output

We installed a 74.21kWp rooftop Solar PV system at DoubleTree Hilton, delivering a fast, efficient installation completed within just two weeks. The system will enhance the site's energy efficiency, providing an annual carbon reduction of 15,330kg while helping to lower ongoing electricity costs.

THE PROCESS

The installation was completed quickly and seamlessly, ensuring minimal disruption to daily operations while enabling the site to begin generating its own electricity immediately.

THE RESULT

DoubleTree Hilton can now benefit from lower electricity costs and generate 65,800kWh of clean energy every year, demonstrating a clear commitment to sustainability and Net Zero targets.
