Tonnes**
of CO₂ emissions

**43,106
kWh**
Annual Energy
Generation

**46.74
kWp**
Array output

We installed a 46.74kWp rooftop Solar PV system at GEMU, delivering a fast, efficient installation completed within just one week. The system will enhance the site's energy efficiency, providing an annual carbon reduction of 12,922kg while helping to lower ongoing electricity costs.

THE PROCESS

The installation was completed quickly and seamlessly, ensuring minimal disruption to daily operations while enabling the site to begin generating its own electricity immediately.

THE RESULT

GEMU can now benefit from lower electricity costs and generate 43,106kWh of clean energy every year, demonstrating a clear commitment to sustainability and Net Zero targets.
