**15.01
kWp**
Array output

We installed a 15.01kWp rooftop Solar PV system at Living Well for Willowbrook Hospice, delivering a fast, efficient installation completed within just one week. The system will enhance the site's energy efficiency, providing an annual carbon reduction of 4,596kg while helping to lower ongoing electricity costs.

THE PROCESS

The installation was completed quickly and seamlessly, ensuring minimal disruption to daily operations while enabling the site to begin generating its own electricity immediately.

THE RESULT

The site can now benefit from lower electricity costs and generate 15,330kWh of clean energy every year, demonstrating a clear commitment to sustainability and Net Zero targets.
