

SHAWTON ENERGY

INTRODUCTION & OVERVIEW

Shawton
ENERGY

WHO ARE SHAWTON ENERGY?

Shawton Energy, part of the Shawton Group founded in 1986, is a family-run business with a strong reputation in the energy sector. Our experienced team delivers renewable energy, project management, and strategic expertise to support projects of all sizes.

We help businesses reduce costs and improve sustainability through funded, zero-capex solar solutions and flexible financing, lowering reliance on the grid and protecting against rising energy prices.

Shawton Energy is owned by AMPYR Distributed Energy (ADE), a rapidly growing UK onsite renewables company that funds, owns, and operates renewable energy assets for businesses. ADE is part of the AGP Group, a global investor and asset manager focused on sustainable real assets across energy, digital infrastructure, and real estate.

WHY CHOOSE US?

Sustainability Expertise

We specialise in commercial solar and sustainable energy solutions, helping your business move confidently toward net-zero.

Enabled by Technology

Smart monitoring and data-driven optimisation ensure full transparency through an easy-to-use online **portal**.

Integrated In-House Delivery

We manage every stage internally, from site analysis to maintenance, providing a smooth, non-disruptive installation.

Installation & Engineering

Our accredited engineering teams install and manage high-performing systems to ensure maximum energy generation.

BENEFITS TO A POWER PURCHASE AGREEMENT

A Power Purchase Agreement, or PPA, is a long-term contract between an electricity generator and an energy user.

Under a PPA, an organisation agrees to purchase electricity from a specific renewable asset at an agreed price and for a defined term. The structure of that agreement determines how the electricity is delivered and how the financial settlement works.

PPAs typically run for 10 to 25 years and provide a degree of price certainty that traditional supply contracts cannot.

In addition to price stability, PPAs help renewable projects secure financing by providing predictable long term revenue. For buyers, they can also support sustainability goals by linking electricity use to renewable generation.

No upfront costs

The solar PV system is installed and funded by Shawton Energy, so you do not need to make a large initial capital investment.

Stable energy costs

A power purchase agreement gives you greater certainty over electricity pricing across the contract period.

Lower electricity bills

Electricity generated on site from solar PV is often cheaper than grid electricity in the UK, leading to immediate savings on your energy bills.

No maintenance responsibility

Shawton Energy typically handles installation, monitoring, and maintenance, so you benefit from solar power without the operational burden.

OUR PROCESS

01 Scope

We begin by thoroughly understanding your business needs, future energy goals, available roof or ground space, and site layout. This helps us design the most effective solar solutions tailored to your specific situation. If any repair work is required before installation, we offer a range of solutions to ensure your site is fully prepared for optimal solar performance.

02 Design

We develop and present an optimal solar panel design tailored for your business. Our goal is to deliver significant cost savings while ensuring the design aligns with your carbon reduction commitments. By understanding your unique energy needs and sustainability objectives, we create a solar solution that maximises efficiency and supports your long-term environmental goals.

03 Sign-Off

We facilitate the agreement and sign-off process for the Power Purchase Agreement (PPA) and lease agreements. This ensures that all terms are clearly defined and mutually agreed upon, providing a solid foundation for your solar project. These agreements outline the financial and operational aspects of your solar installation, ensuring transparency and alignment with your business objectives.

04 Install

We leverage our expertise to professionally install and operate solar generation systems on your premises. Our team ensures that the installation process is conducted promptly and with minimal disruption to your business operations. We are committed to delivering a seamless transition to solar energy, allowing you to benefit from sustainable power with confidence and efficiency.

05 Maintain

Under a PPA, we provide real-time management of your solar energy generation and supply, ensuring optimal performance at all times. Our team is dedicated to maintaining your equipment through regular servicing and prompt repairs, reducing downtime and increasing efficiency. This proactive approach ensures that your solar system operates smoothly and reliably, supporting your business's energy needs.

WHO WE WORK WITH

At Shawton Energy, we partner with a wide range of professionals and organisations who are driving sustainability, energy savings, and decarbonisation for their clients or properties.

Sustainability & Carbon Consultants

Helping businesses reduce scope 2 emissions and meet Net Zero targets.

Energy Brokers & Consultants

Adding solar PV into wider energy procurement and efficiency strategies

Facilities & Estate Managers

Improving building performance, cutting operational costs, and meeting compliance targets

ESG & Compliance Officers

Supporting SECR, TCFD and broader ESG reporting frameworks

Property & FM Advisors

Helping landlords and asset owners increase building value and achieve sustainability goals across portfolios

KEY PARTNERSHIPS

CASE STUDIES

Iceland 10 MWp PPA multi-site rollout

Solar rollout across distribution & retail sites.

Kings Cross 8.6 MWp Solar Farm

Supplying clean power directly to King's Cross estate. Landmark example of off-site corporate PPAs via virtual PPA.

IGC 3 MWp Roof Top Install

Full turn-key solution, under a 25-Year Power Purchase Agreement.

Uniroyal 1 MWp

Installed over a 16 week period, with no disruption to the site.

Carlton Academy 817kWp over 7 sites

Solar deployment delivered with no upfront cost under a PPA.

INSTALLATION HISTORY & PROGRESS

405

Solar Installations delivered over the last 5 Years.

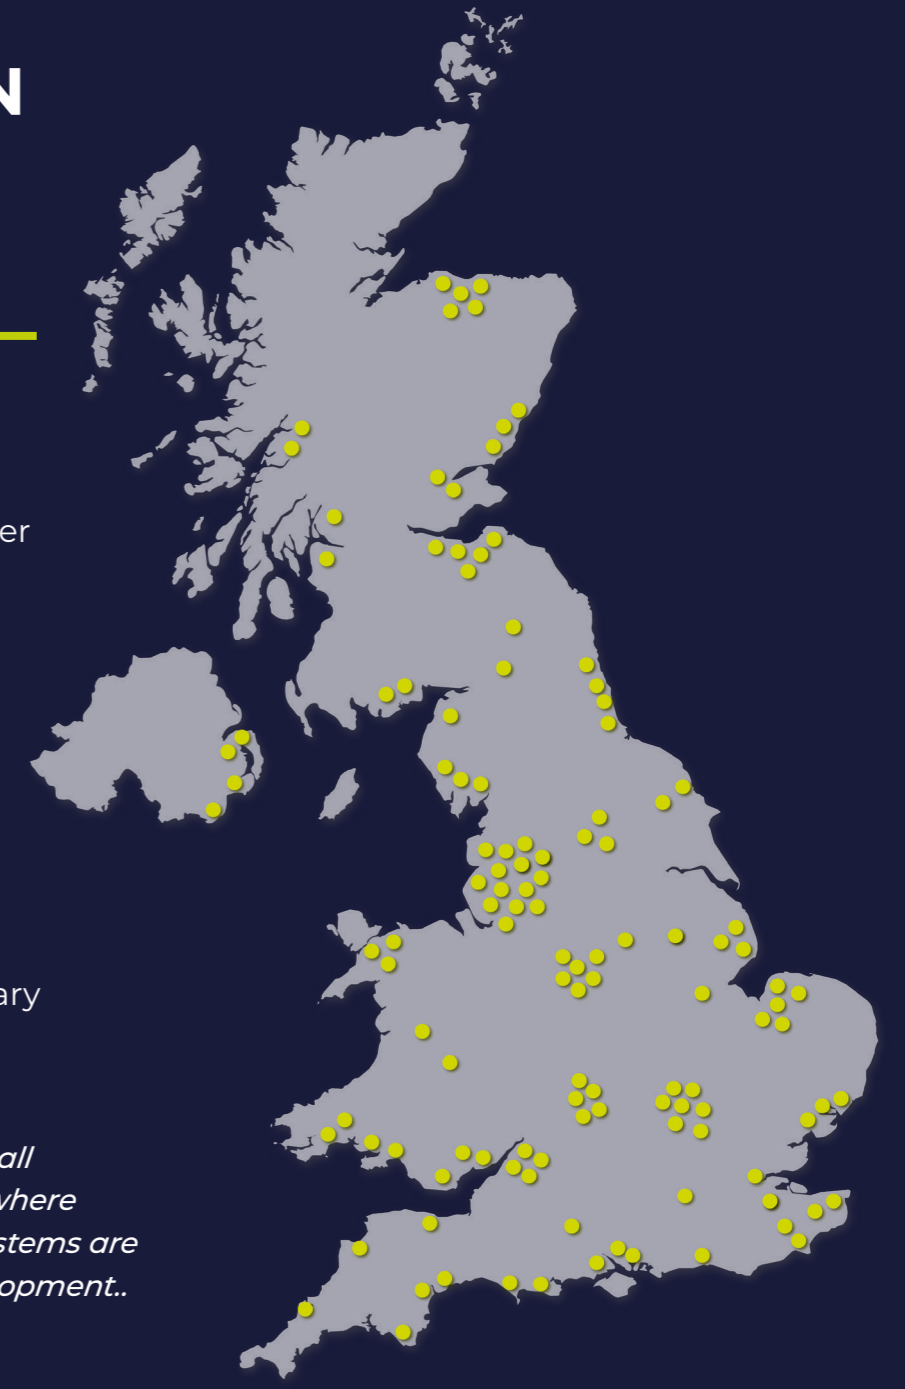

>100 MWp

Of clean energy operational today.

320 MWp

Pipeline launching from January 2026.

See the map on the right for all the locations across the UK where Shawton Energy Solar PV Systems are currently installed or in development..

FULLY FUNDED, TURN-KEY LONG TERM SOLUTIONS

Trusted by businesses across the UK, we help organisations take control of their energy future.

From initial consultation through to delivery and ongoing support, we provide a clear, practical pathway towards greater efficiency and long-term sustainability.

Speak to our team today to explore how we can support your business.
