CASE STUDY

Willowbrook Hospice

We installed a 91.43kWp rooftop Solar PV system at Willowbrook Hospice, delivering a fast, efficient installation completed within just two weeks. The system will enhance the site's energy efficiency, providing an annual carbon reduction of 25,830kg while helping to lower ongoing electricity costs.

THE PROCESS

The installation was completed quickly and seamlessly, ensuring minimal disruption to daily operations while enabling the site to begin generating its own electricity immediately.

THE RESULT

Willowbrook Hospice can now benefit from lower electricity costs and generate 86,202kWh of clean energy every year, demonstrating a clear commitment to sustainability and Net Zero targets.
