

INTRODUCER PARTNERSHIPS

HELPING YOUR CLIENTS ACCESS
RENEWABLE ENERGY SOLUTIONS
WITH CONFIDENCE

Shawton
ENERGY

A PARTNERSHIP BUILT AROUND SHARED SUCCESS

Many organisations are exploring renewable energy, but few have the expertise, funding capability, or internal resource needed to take projects from concept through to delivery.

That creates an opportunity for trusted advisors, consultants, property professionals, and energy specialists to add value to their clients by introducing the right delivery partner at the right time.

Shawton Energy works alongside introducers to help businesses reduce energy costs, improve sustainability performance, and access renewable energy solutions without unnecessary complexity.

Our approach is straightforward. We provide the technical, commercial, funding, and delivery expertise required to bring projects to life, while allowing our partners to strengthen relationships and create additional value for their clients.

PROJECTS WE SUPPORT

On Site Solar

Solar generation installed directly on the customer's buildings, rooftops, car parks, or available land.

Private Wire Solar

Renewable energy generated from nearby land and supplied directly to the customer through a dedicated private connection.

Multi-Site Programmes

Structured renewable energy rollouts across portfolios, estates, and national property networks.

Funded Solar Solutions

Projects delivered through Power Purchase Agreements, allowing customers to access renewable energy without upfront investment.

WHO WE WORK WITH

At Shawton Energy, we partner with a wide range of professionals and organisations who are driving sustainability, energy savings, and decarbonisation for their clients or properties.

Sustainability & Carbon Consultants

Helping businesses reduce scope 2 emissions and meet Net Zero targets.

Energy Brokers & Consultants

Adding solar PV into wider energy procurement and efficiency strategies

Facilities & Estate Managers

Improving building performance, cutting operational costs, and meeting compliance targets

ESG & Compliance Officers

Supporting SECR, TCFD and broader ESG reporting frameworks

Property & FM Advisors

Helping landlords and asset owners increase building value and achieve sustainability goals across portfolios

IDENTIFYING SUITABLE OPPORTUNITIES

High Electricity Consumption

Multiple sites or large estates

Suitable roof space or land

Net Zero or ESG objectives

Certainty over energy costs

Avoiding upfront capex

HOW IT WORKS

01 Introduction

You introduce a potential opportunity and provide any relevant background information.

This initial discussion helps us understand the customer's objectives, operational challenges, and any existing energy infrastructure.

02 Assessment

Shawton Energy carries out a high-level review of the opportunity, assessing energy consumption patterns, site suitability, and overall project viability. We consider factors such as available space, energy demand, existing utilities, and potential technologies that may be suitable.

This enables us to determine whether there is a realistic opportunity to deliver meaningful energy and financial benefits.

03 Modelling

Where appropriate, we develop a detailed proposal outlining technical options, commercial benefits, and funding structures, providing the customer with a clear understanding of the available opportunities and outcomes.

04 Engagement

We work collaboratively with both you and the customer throughout the review process, ensuring communication remains clear and aligned.

Our approach is transparent and consultative, helping customers make informed decisions while ensuring introducers remain updated on progress at every key stage.

05 Support

Once approved, Shawton Energy takes responsibility for managing the full delivery process.

This includes project development, design, procurement, installation, commissioning, and operational handover.

Throughout the process, our objective is to make the experience straightforward for both the customer and the introducer.

CASE STUDIES

Iceland 10 MWp PPA multi-site rollout

Solar rollout across distribution & retail sites.

Kings Cross 8.6 MWp Solar Farm

Supplying clean power directly to King's Cross estate. Landmark example of off-site corporate PPAs via virtual PPA.

IGC 3 MWp Roof Top Install

Full turn-key solution, under a 25-Year Power Purchase Agreement.

Uniroyal 1 MWp

Installed over a 16 week period, with no disruption to the site.

Carlton Academy 817kWp over 7 sites

Solar deployment delivered with no upfront cost under a PPA.

INSTALLATION HISTORY & PROGRESS

405

Solar Installations delivered over the last 5 Years.

>100 MWp

Of clean energy operational today.

320 MWp

Pipeline launching from January 2026.

See the map on the right for all the locations across the UK where Shawton Energy Solar PV Systems are currently installed or in development..

START THE CONVERSATION

Successful partnerships are built on trust, transparency, and shared objectives. Our aim is not simply to deliver a project, it is to become a trusted extension of your team, providing the expertise and support needed to help your clients make informed energy decisions with confidence.

If you work with organisations that are exploring renewable energy, reducing energy costs or progressing their sustainability objectives, we would be pleased to discuss how Shawton Energy can support both you and your clients.
